

# The Bible Says

## If There Is No God

J. T. Smith

If there is no God, how did the earth and the sun come to be poised some 240,000 miles from the moon, whose gravitational pull produces ocean tides? And, how does it stay in that exact spot? Also, the earth is tilted on its axis at exactly 23.5 degrees. Were that tilt to be reduced to zero, much of the Earth's water would accumulate around the north and south poles, leaving vast deserts in their place. *It did this on its own?*

Evolutionist Ernest Borek has observed: "The membrane recognizes with its uncanny molecular memory the hundreds of compounds swimming around it and permits or denies passage according to the cell's requirements." *Just Happened?*

It has been estimated that if all the DNA in an adult human were placed end-to-end, it would reach to the Sun and back (186 million miles) 400 times. *Result of the "Big Bang"?*

Carl Sagan observed that "The information content of a simple cell has been estimated as around one trillion bits."

Thus, a single cell contains the equivalent information content of every book in the world's largest library of more than ten million volumes! Every rational person recognizes that not one of the books in such a library "just happened." Rather, each and every one is the result of intelligence and painstaking design. Yet Evolutionists say: "*Man Evolved!*"

The Bible simply begins: **Genesis 1:1-3** "In the beginning God created the heaven and the earth. <sup>2</sup>And the earth was without form, and void; and darkness was upon the face of the deep. And the Spirit of God moved upon the face of the waters. <sup>3</sup>And God said, 'Let there be light: and there was light'."
